Galil Motion Control Debuts Two-Minute Video Library *Provides Technical Solutions for Busy Engineers*

Galil Motion Control has released a library of two minute videos which present solutions to common motion and I/O problems. Designed for busy engineers, the videos are a technical resource to help engineers get a quick start on their motion projects. Galil plans to add videos frequently to build a library of solutions.

"We added this technical resource to our website to offer relevant solutions in a format that can be quickly accessed and easily viewed", says Lisa Wade, Vice President of Sales and Marketing at Galil.

Currently available videos show how to achieve smooth multi-axis motion through arbitrary points, demonstrate how to achieve precise temperature of a liquid, introduce the RIO Pocket PLC, and present commonly-used features of Galil's Accelera Series motion controllers. Future videos will show how specific motion problems can be solved in addition to providing how-to explanations and demonstrations.

The videos are available for viewing 24/7 at no charge at: <http://www.galilmc.com/learning/two-minute-videos.php>

About Galil Motion Control, Inc. (www.galilmc.com)

Privately held and profitable for over 100 consecutive quarters, Galil Motion Control, Inc. was founded in 1983 by Jacob Tal and Wayne Baron. Galil became the first company to produce a microprocessor-based servo motor controller without tachometer feedback. Since then, Galil has continued to advance motion control technology and has found industry-leading acceptance with over 500,000 controllers successfully installed worldwide. Various applications include machines for the medical, semiconductor, machine tool, food processing and textile industries. Recently, Galil has introduced several motion and I/O controllers for the Ethernet including the high-speed Accelera motion controllers and the RIO Pocket PLC series.

Galil Motion Control, Inc. 270 Technology Way, Rocklin, CA 95765, Phone 800-377-6329.
