### Galil Offers Their Free 2003 Motion Control Product Catalog

*New Edition Has Been Completely Overhauled For Easy Controller Analysis and Selection*

**Rocklin, CA., March 25, 2003**—Galil Motion Control, the industry innovator in motion control technology, has completely re-designed and re-formatted their 2003 Motion Control Product Catalog with comprehensive features, technical specifications, pricing on their full line of single or multi-axis, bus-based or stand-alone, and box-level or card-level controllers. There's also a convenient selection matrix that helps to guide users to the right controller for their application.

The easily readable, 96-page catalog also expounds on the various interface options available, including PCI, ISA, PC/104, VME, cPCI, USB, RS232 and Ethernet; and tells how Galil's 1-, 2-, 3-, 4-, 5-, 6-, 7- and 8-axis controllers can be configured to run stepper or servo motors on any combination of axes.

Additionally, the 2003 catalog describes Galil's controller accessories, such as interconnect boards, amplifiers, cables and I/O expansion modules; and Galil's tools, including WSDK servo tuning software and their Tool kit for developing operator interfaces for Galil controllers. Users will also find programming examples for modes of motion, such as point-to-point positioning, jogging, and circular interpolation, contouring and electronic gearing.

Galil's 2003 Motion Control Catalog is available at no cost and can be shipped immediately by calling Galil at 1-800-6329; or by going directly to <http://www.galilmc.com/products/catalog.html>. From there, visitors can also download the product specifications of their choice.

**About Galil Motion Control, Inc.**

Privately held and profitable for over 68 straight quarters, Galil Motion Control, Inc. was founded in 1983 by Jacob Tal, world-famous innovator and educator in motion control. Galil became the first company to produce a microprocessor-based servo motor controller without tachometer feedback. Since then, Galil has continued to advance motion control technology and has found industry-leading acceptance with over 300,000 controllers successfully installed worldwide. Various applications include machines for the medical, semiconductor, machine tool, food processing and textile industries. Recently, Galil has introduced several motion controllers for the Ethernet.
