Galil Offers Updated 2006 Motion Control Product Catalog

Available at no cost in both print and online versions

Rocklin, CA., January 9, 2006—Galil Motion Control, the industry innovator in motion control, has updated their Motion Control Product catalog for 2006 with the latest specifications and pricing for their controllers and drives. The new catalog includes Galil's latest generation motion controllers: the Accelera Series which processes commands ten times faster than prior generation controllers. A hardcopy version of the 96-page catalog can be ordered by calling Galil at 1-800-377-6329 or going to <http://www.galilmc.com/products/catalog.html>. It can also be downloaded in any part or in its entirety from this same web link.

In addition to the high speed Accelera Series, Galil's catalog covers their popular DMC-18xx PCI bus controllers, and DMC-21x3 Ethernet motion controllers and drives. Designed for either stepper or servo motors, the DMC-21x3 combines a high-performance Ethernet motion controller that attaches directly to a multi-axis drive without additional wiring or cables.

The 2006 catalog features a comprehensive motion control overview that provides several programming examples for various modes of motion. These include point-to-point positioning, jogging, linear and circular interpolation, contouring and electronic gearing.

Additionally, the catalog details Galil's WSDK servo tuning software for "one-button" PID tuning and ActiveX Tool kit for developing operator interfaces for Galil controllers.

Galil's family of motion controllers include single and multi-axis, bus-based and stand-alone, and box-level and card-level controllers. Available interface options include PCI, ISA, PC/104, VME, cPCI, USB, RS232 and Ethernet. Controllers are available in 1-, 2-, 3-, 4-, 5-, 6-, 7- and 8-axis versions and can be configured to run stepper or servo motors in any combination of axes. All Galil controllers feature ease-of-use, high performance, and guaranteed lowest cost per 100 quantities.

For information about Galil motion controllers and drives, contact Lisa Wade, VP-Marketing and Sales, at Galil Motion Control, Inc., 3750 Atherton Road, Rocklin, CA 95765, 800-377-6329, lisaw@galilmc.com, Ph. 916-626-0101, Fax 916-626-0102, www.galilmc.com. Order the free catalog at 800-377-6329 or at <http://www.galilmc.com/products/catalog.html>.

###

About Galil Motion Control, Inc.

Privately held and profitable for over 80 consecutive quarters, Galil Motion Control, Inc. was founded in 1983 by Jacob Tal and Wayne Baron. Galil became the first company to produce a microprocessor-based servo motor controller without tachometer feedback. Since then, Galil has

continued to advance motion control technology and has found industry-leading acceptance with over 350,000 controllers successfully installed worldwide. Various applications include machines for the medical, semiconductor, machine tool, food processing, and textile industries. Recently, Galil has introduced several motion controllers for the Ethernet in addition to the latest generation Accelera controllers designed for ultra high-speed and performance.
