

Do you have 2Meg Flash Memory or 4Meg Flash Memory?

Firmware for the controller can be determined using the Galil Software. Using the Options menu on a Galil Terminal, select "Version". 2Meg Flash Memory is designated as 1.xx firmware and 4Meg Flash Memory is designated with 2.xx firmware. The Galil Command <CTRL> R <CTRL> V can also be used to determine the current controller firmware.

The 2Meg Flash Memory firmware files are....

D160r1YX.hex	Normal DMC-1600 firmware - 2MEG Flash Memory
D160f1YX.hex	Special firmware optimized for fast sample rate - 2MEG Flash Memory
D16061YX.hex	Special firmware for 16 bit analog feedback - 2MEG Flash Memory

Where "Y" equals the release number and "X" equals the revision number.

The 4Meg Flash Memory firmware files are....

D160r2YX.hex	Normal DMC-1600 firmware - 4MEG Flash Memory
D160f2YX.hex	Special firmware optimized for fast sample rate - 4MEG Flash Memory
D16062YX.hex	Special firmware for 16 bit analog feedback - 4MEG Flash Memory

Where "Y" equals the release number and "X" equals the revision number.
